## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election with traverse of Group I in the reply filed on 07/26/2007 is acknowledged. The traversal is on the ground(s) that search of all the groups would not be burdensome. This is not found persuasive because Groups II-III also require search of classes 424 and 525 not required for the elected Group.

The requirement is still deemed proper and is therefore made FINAL.

Claims 16-19 and 23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 07/26/2007.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, 7, 20-22 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Vesalius NV (NL'190).

Art Unit: 1615

The translation of the NL'190 provides for a polymer composition comprising a pre-polymer, a filler and a curing agent. The composition has the same viscosity, curing characteristics and elastic modulus (see claims 1-3). Fillers and biocompatible polymers are also disclosed in claims 5 and 7. The use of the composition is also defined for repair of aneurysms (see claim 20). The instant claims are clearly anticipated by Vesalius NV.
